

Mouy, February 3 2015

We are pleased to announce to you that SEICER has recently joined TEC AUTOMATISMES within AIF group.

SEICER specializes in the design and the manufacturing of electronic boards and beams, and is certified ISO 9001 and EN 9100.

Through this operation, TEC AUTOMATISMES (AIF), manufacturer of electromechanical components as well as electrical and electrotechnical products, reaffirms its strategy to position its offer on applications with stronger added value, requiring a high degree of reliability, safety and follow-up for particular environments.

This operation will really reinforce R&D abilities, mainly thanks to the expertise in aeronautics requirements, and this will also allow us to get specific abilities in the manufacturing of electronic cards with CMS technology.

On its side, SEICER company will benefit from TEC AUTOMATISMES means and infrastructure . Its expertise will be offered to TEC AUTOMATISMES customers by a larger sales force. SEICER will also accede directly to low cost manufacturing means (Tunisia) and its financial surface will be enlarged through an increase in capital to allow this company to face ambitious development plans.

Once they have joined their means, these two companies will be in a position to offer a larger range of products and services, from the prototype up to mass production, at more adapted costs.

AIF Group has now a global sales turnover of 12 M€, a net book value over 3,000 K€, with 175 employees, and dedicates more than 7% of its sales turnover to R&D.

The staff of both companies wishes to keep you in the heart of their plans.

Benoît DE BRAY

President of AIF Group
